

Offering the most competitive natural gas, electricity and telecoms prices to all UK businesses.

Following deregulation of the UK electricity and gas supply markets, Direct Power was set up to offer a specialist, quality service, to all industrial and commercial users of energy. Competition in supply of utilities has allowed Direct Power to deliver the advantages of a free market, by offering independent advice on all contract matters.

We negotiate contracts with all major suppliers and generate maximum savings for our clients **FREE OF CHARGE**. We receive a commission from the utility supplier who wins your business, and we do not take a percentage of your savings like many of our competitors.

All of our clients benefit by receiving Direct Power's extensive list of services at no additional charge. These key services include:

- Receiving **the most competitive prices** in the market for supply of energy to your premise. Our unique pricing model and reporting system outlines the top suppliers and contract offers to your site.
- **Receiving expert and appropriate advice** on when to renew your contracts, and for what length of time. We continually track wholesale energy markets, ensuring you see competitive options.
- **Save both time and money**. We have excellent relationships with all major suppliers and have dedicated account managers within each company. This enables us to negotiate the most competitive prices, using our buying power to maximize savings for our clients. You only need to review our analysis of the prices offered, and request a contract through us. The final decision will always remain with you, the client.
- All clients that sign through Direct Power benefit from our **"contract watch"** system. We will ensure your supplier is billing you correctly, and remind you of your renewal date so to avoid any "out-of-contract" price hikes.
- All clients have a dedicated Direct Power consultant to channel any queries. **Call us anytime** for advice on all energy matters for the duration of your contract free of charge!
- Assistance in setting up **Government subsidised energy audits**.

Please [Contact Us](#) if you would like to take advantage of Direct Power's services today.
